

Texas GoMath Lesson Plans 1st grade Non-Standard Measurement

If you do not have the specific items listed in the directions/problems, please substitute it for something you DO have. 1st grade does not measure with rulers, we use non-standard items such as paperclips, string, markers, cubes, etc. Items you could use at home are cereal, like coins, crayons, hands, etc. Complete each lesson *with* your child except the last one. Encourage exploration with this topic- make it fun!

Lesson 1: 17.1- Length pgs. 591-596

Lesson 2: 17.2- Use Non-standard Units to Measure Length pgs. 597-602

Lesson 3: 17.3- Make a Non-standard Measuring Tool pgs. 603-608

Lesson 4: 17.4- Explore Length pgs. 609-614

Lesson 5: Module 17 Assessment pgs. 615-616. Read the directions for each question to your child. Send a picture of the front and back of the worksheet to your child's teacher for her to grade.
